

*EDUCATION • SECURITY • SAFETY*

The eSEC consortium consists of 6 partners from 6 different European countries: University of Zilina, Slovak republic, Faculty of Criminal Justice and Security, University of Maribor, Ljubljana, Slovenia, Faculty of Applied Informatics, Tomas Bata University in Zlin, Czech Republic, Dipartimento di Scienze della Terra, University of Messina, Italy, Polytechnic Institute of Leiria, ESTM-IPL Sant. Portugal, Telecom & Management SudParis, France.

Coordinating organization of the eSEC project is University of Zilina. The eSEC team consists of team from Slovakia: Tomáš Loveček – project coordinator, Katarína Kampová, Jozef Ristvej, Zuzana Bizoňová and Lucia Hrebeňárová and one coordinating person from each partner institution: Gorazd Meško from Slovenia, Roman Jašek from Czech Republic, Giovanni Randazzo from Italy, Roberto Gamboa from Portugal, Katherine Mailler from France.

The partnership is well covering the European area, west, east and south of Europe. The challenge for the future will be to involve the northern part of Europe, which is part of future development of the portal. Also the partnership is covering different views in different fields of security, which is giving added value in multicultural and multicountry environment.

The eSEC project consists of relevant partners with long tradition and very good cooperation among each other since the project begins.

What is most important is, that the consortium possesses all skills and competences required to carry out this project successfully, namely:

The University of Zilina, Slovak republic:

- Faculty of special engineering is focused on the area: the crisis management, private security, transport security and security services.
- Faculty of Management Science and Informatics is focused on programming, information systems and architecture of information systems, etc.
- The Institute of Continuing Education has experiences with translations into English, with the didactical and education process of the project.

Faculty of Criminal Justice and Security, University of Maribor, Ljubljana, Slovenia. The activities of the faculty are focused on the field of security such as criminology, criminality and national and private security, which is also one of the areas of the eSEC project.

Tomas Bata University in Zlin, Czech Republic, the main focus of this faculty is on modern methods of automatic control theory, monitoring and control of technological processes, information technologies, software engineering, mathematical modelling of technological processes, etc.

Dipartimento di Scienze della Terra, University of Messina, Italy carries out research and teaching activities in all branches of Earth Sciences, with particular reference to Geomorphology, Environmental Geology, Seismology, Geology, Volcanology, Petrography and Mineralogy. Through formal agreements related to research projects, the Earth Science Department performs advanced research on regional geological hazards and activities in the framework of national projects for South Italy monitoring.

Polytechnic Institute of Leiria, ESTM-IPL Sant, Portugal focused its activities on the Civil Protection area.

Management SudParis, France focuses on Information and Communication Science and Technology. Research is carried out by the academic staff who provide both management technical expertise. The main areas of research are: Networks and services, IT, Signal and image processing, Information Systems, ICT management, economy and law, ICT marketing.
